Farm Safety

According to the National Safety Council, agriculture is the most hazardous industry in the nation.

Roll-over protective structures (ROPS) would save 350 lives annually on US farms.

Farm Safety Tips:

- Do not carry an extra passenger when operating a tractor.
- Make sure to wear protective equipment such as boots, safety gloves, etc.
- Routinely check all farm equipment.
- Only operate tractors with ROPS and seat belts.

Did You Know?

- 40% of farm workers are under 20 years old.
- 59% of US tractors are equipped with ROPS and seat belts.
